Summary

I'm a Frontend web developer, I have a solid knowledge of building the Frontend of a website with the use of HTML, CSS and JavaScript (libraries and frameworks such as Vue, Jquery, Bootstrap e.t.c inclusive).I am capable of transforming PSD into website, work with a group of other developers to archive a goal, build a static website from scratch, maintain, upgrade websites and a lot more..
I'll also like to include that I possess the ability of keeping the code base as orderly as possible.
Check my GitHub repository for some of my side projects.
THANKS.
